

# **I**nformation Security Policy

**RAD** management is committed to protecting the data, information and privacy of its customers and employees and provides all the necessary resources for this purpose.

RAD strives to maintain a safe, reliable and secured work environment in order to ensure the confidentiality, integrity and availability of its various information assets and intellectual properties.

To support the above, RAD has implemented and institutionalized its Information Security Management System (ISMS) in compliance with **ISO-27001**, making information security an integral part of its business processes, procedures and methodologies.

RAD uses a continuous improvement approach to address all requirements and applicable regulations by constantly monitoring and reviewing the ISMS.

RAD relies on the uncompromising commitment and personal accountability of its employees to attain the highest level of security for all forms of company data and information assets.
